SPRAYING SPECIALISTS SINCE 1895

Visit a modern website, with an adaptive design, providing optimum readability, even on a tablet and telephone.

Find our detailed product sheets with technical and practical information and all of the product advantages.

Discover the group's history and advice from the pros so that you can take care of your garden like a professional.

1895 : Company founded by Paul Berthoud who wanted to industrialize the production of copper knapsack sprayers.

1938 : The second generation Ferdinand and Jean Berthoud, his two sons, joined the company in turn.

1956 : Arrival of the third generation with cousins Guy and Didier whose priority is to attack the home market with a specific range «Flori-Leisure».

1969 : Centralization of all services (production, sales, despatch) in Villefranche-sur-Saône (France)

1987 : The company is taken over by Patrick Ballu and joins EXEL Industries, world leader in spraying.

Berthoud becomes one of the strongest brands at HOZELOCK-EXEL holding for many years almost 40% of the French market (in value), an undisputed leader.

Berthoud products are recognised as being highly professional. This is in part due to their agricultural origins and their long term market presence. It will come as no surprise that the company's core clients are the experienced gardener and the professional.

The company meets its customers' exacting requirements in three ways:

- by offering an unrivalled breadth or product range
- by offering impeccably engineered, high-performance sprayers
- by offering excellent after-sales service

For more information visit our website :

www.berthoud.fr/en

A NEW GRAPHIC CHARTER FOR BERTHOUD

Berthoud's graphic charter for packaging has been reviewed in order to provide products with better visibility and readability. In coherence with Berthoud's brand image, the new packaging highlights more technical information and the associated consumer advantages in order to enhance the differences with regards to the competition.

Modernisation of the BERTHOUD charter, still oriented towards PREMIUM positioning

Communication on the strong points of the BERTHOUD brand:

- 100% made in France
- Ultra-high performance Customer Service in France: 5-year warranty and spare parts availability for at least 10 years after marketing of a model stops
- Unique technical concepts on the sprayer market

Complete compatibility of our entire BERTHOUD sprayer offering with the new natural products available on the French market in addition to phytosanitary products.

Since 1 January 2017, self-service sales of chemical pesticides to amateur gardeners has been prohibited in France. Biocontrol products or those with a low risk are not concerned by this measure. And on 1 January 2019, the sale of chemical pesticides will be prohibited for private individuals.

All of our Berthoud sprayers are **adapted for spraying phytosanitary and natural products**, which are sometimes more aggressive chemically, thanks to the following measures set up:

- **Static and dynamic tests** conducted across all of the garden product brands (Natria, Neurdooff, Naturen, Clairland ...)
- Adaptation of our seals: **reinforced seals** in order to provide compatibility with the new natural products

Precautions to be taken in order to guarantee optimum service life for your sprayer:

- **Rinse the device well after each use**
- **Grease the sprayer's seals twice a year (see instructions)**

Quality products for reliable and efficient sprayers

Sprayers manufactured in France

All our sprayers are manufactured in our factory in France. The quality of the components and their assembly, the rigorous monitoring at all stages of manufacturing and the systematic tracking are all measures to ensure high quality, durable and reliable products.

Durable products

Berthoud guarantees their manual knapsack sprayers and compression sprayers over 2L for 5 years (under the conditions specified in the equipment's user manual for products sold since September 1st 2007) except mistblowers, pulvexel and Greenpower ranges.

A priority : Quality

The company is certified ISO 9001 version 2008, a guarantee of quality procedures at each stage of the design, manufacture and distribution of our sprayers.

A performing after sales service

All our products are repairable thanks to our After Sales Service which guarantees the availability of spare parts for at least 10 years after the end of the products commercialization.

Clear segmentation of the range according to use (Garden treatments, Weeding, Do-it-yourself) in order to assist the consumer in making his choice.

F1 / SPIROVIT

Handhelds are lightweight, small and primarily designed for the treatment of indoor and outdoor plants but come in just as handy for such household chores as dampening the laundry prior to ironing, window cleaning, or spraying pets with treatments.

F1 - Gardening DIY

101135

For the house, the garden and for DIY

- Polyethylene reservoir with graduated gauge : capacity 1 L
- Watertight neck
- Swirl nozzle with adjustable and sealable jet
- Large base for good stability (even when empty)
- Sealable nozzle that can be locked ("child safe")
- Full-grip trigger

TIP N°1

"Never spray in very hot weather."

"Avoid spraying between 10.00 AM and 6.00 PM. The best time for spraying is in the evening after 8.00 PM or early in the morning when the plants open and breathe."

F1 PLUS

101210

With wide opening for the garden

- Polyethylene reservoir with graduated gauge capacity : 1 L
- Cylindrical shape with 'full opening' (screw top)
- 'XL' high-performance sprayer head
- Swirl nozzle with adjustable jet

SPIROVIT

101088

For banks of plants, balconies, terraces and small gardens

- Large-capacity polyethylene reservoir with graduated gauge : 5 L
- Shoulder strap
- Length of hose : 1.5 m
- High-performance 'CANYON' sprayer head
- Nozzle with adjustable jet

F2 PLUS

F2 PLUS - Plant care

101223

Balconies, terraces and small gardens

- Reservoir : yellow blow moulded polyethylene
- Total capacity : 2 L, Usable capacity : 1.5 L
- Manual pressure pump with integrated safety valve
- Ergonomic handle
- Nozzle with adjustable jet and brass insert

TIP N°2

"Small sprayers can be used for spot treatment of individual plants.

Using several sprayers avoids mixing products, in particular mixing weed killers with pesticides/fungicides."

F2 PLUS - DIY

101218

For the house and DIY

- Reservoir : yellow blow moulded polyethylene
- Total capacity : 2 L
- Usable capacity : 1.5 L
- Manual pressure pump with integrated safety valve and UHR (Ultra-High Resistance) seals
- Ergonomic handle
- Nozzle with adjustable jet and polyamide insert

FLORALY "OPTIMA"

Sprayers that are easy to use for maintaining small and medium sized gardens

Based on Berthoud's extensive experience, the Floraly Optima range represents the best value for money in the market. This new range is characterised by innovations which bring numerous improvements in terms of ease of use, safety and comfort. The range is available in 3 formats : 3-litre, 5-litre and 8-litre, usable capacities, and also comes in a 'DIY' version with resistant seals.

The FLORALY Optima range, combined with the BERTHOUD range of accessories, allows all requirements to be met in both the field of «plant protection» and DIY.

Professional nozzle with integrated nut. Practical to use and easy to change

Polypropylene pump handle and rod

High-resistance braided hose 8 x 12

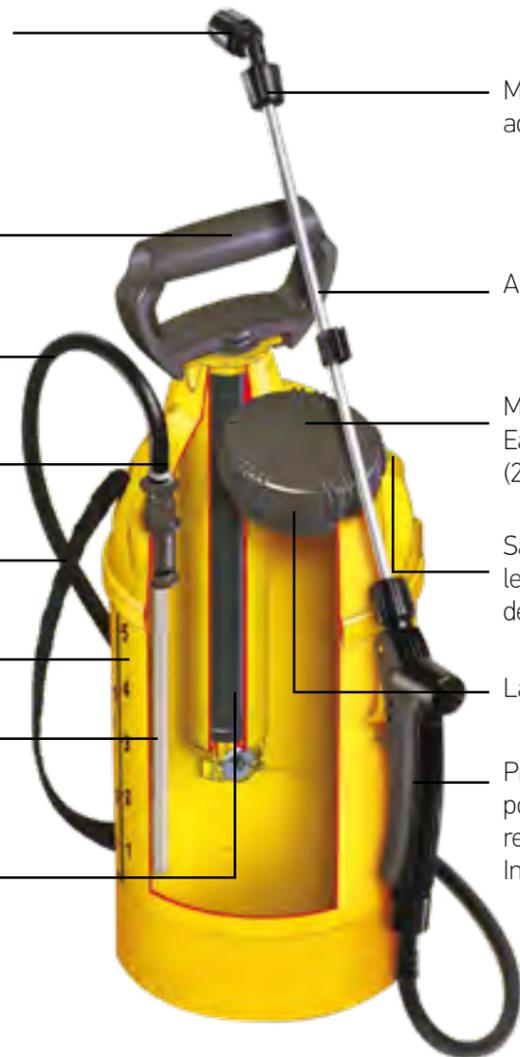

Hose nozzle with swing-joint connection

Adjustable carrying strap Quick-fastening clips

External gauge graduated in litres and US gallons

Translucent tank in resistant injected polypropylene

Fixed pressure pump for user's safety and high mechanical resistance

Multi-purpose nozzle holder with adjustable jet and integrated swirl plate

Aluminium lance with storage clip

Measuring cap Easy and precise dosage (2, 3, 4, 5, 10, 20 and 40 ml)

Safety valve with maximum pressure level indicator (3 bars) and sprayer decompression

Large-diameter filling hole (80 mm)

Professional lance handle in ribbed polypropylene with high mechanical resistance Integrated filter

FLORALY "OPTIMA"

Technical characteristics and advantages for the user

FOR EASIER USE

	Characteristics	Advantages for the user
	Wide opening separate from the pump	Easier filling, mixing and emptying
	Shape of head without retention zone on emptying	Easy, quick and complete emptying
	Cap with integrated measurer (7 dosage possibilities: 2, 3, 4, 5, 10, 20 and 40 ml)	Easy and precise dosage
	Shoulder strap fastening with simple clips	Shoulder straps quick and easy to fasten
	Slide rail for easy storage of the lance	Easy to store lance Simplified storage
	New professional nozzle with integrated nut	Practical to use, easy to change

FOR BETTER SAFETY

	Characteristics	Advantages for the user
	Fixed and off centre pump	User safety: no need to remove the pump for filling and emptying
	Safety valve with maximum pressure level indicator (< 3 bars) and sprayer decompression	No risk of excess pressure on pumping. Quick and easy decompression of the equipment
	Large diameter translucent reservoir with graduated gauge	Liquid level visible Excellent stability on the ground

FOR EXCELLENT COMFORT

	Characteristics	Advantages for the user
	Hose outlet mounted on rotating connector	Easier handling of the hose/lance unit
	New wide pump handle	Ergonomic and robust pump handle
	Professional lance handle with two finger trigger and integrated filter	Ensures a natural position for the wrist and the hand

PRESSURE SPRAYERS

FLORALY 5 OPTIMA

Plant care

101450

For small gardens :
< 300 m²

GARANTIE
GUARANTEE
5 ANS

Medium-sized gardens :
200 to 700 m²

GARANTIE
GUARANTEE
5 ANS
YEARS

- Total tank capacity : 7.2 L, usable capacity : 5 L
- Fixed and off-centre manual pressure pump with nitrile seals
- 3 bar safety valve
- Wide opening on reservoir separate from the pump (diameter : 80 mm)
- Multi-compartment measuring cap : 7 dosage possibilities (2, 3, 4, 5, 10, 20 and 40 ml)
- Nozzle outlet mounted on a swingjoint connection
- Adjustable carrying strap with quick-fastening clip system
- Professional PROFILE-type lance handle.
- Hose length : 1 m
- 40 cm aluminium lance
- Multi-purpose, adjustable nozzle holder with integrated swirl plate
- Delivered with professional swirl nozzle for conical jet

FLORALY 5 OPTIMA

DIY

101452

For treatment of wood and
framework, shutters, moss
control of roofs and paths etc.

GARANTIE
GUARANTEE
5 ANS
YEARS

- Total tank capacity : 7.2 L, usable capacity : 5 L
- Fixed and off centre manual pressure pump with seals that are resistant to hydrocarbon based solvents
- 3 bar safety valve
- Wide opening on reservoir separate from the pump (diameter: 80mm)
- Multi-compartment measuring cap : 7dosage possibilities (2, 3, 4, 5, 10, 20 and 40ml)
- Nozzle outlet mounted on a swing-joint connection
- Adjustable carrying strap with quick-fastening clip system
- Professional PROFILE-type lance handle with resistant seals
- Hose length: 1m
- 40 cm composite lance with flexible end socket
- Multi-purpose, adjustable nozzle holder with integrated swirl plate
- Delivered with professional flat fan nozzle

GUARANTEE
5 ANS
YEARS

- Total tank capacity : 11.5L, usable capacity : 8 L
- Fixed and off-centre manual pressure pump with nitrile seals
- 3 bar safety valve
- Wide opening on reservoir separate from the pump (diameter : 80 mm)
- Multi-compartment measuring cap : 7 dosage possibilities (2, 3, 4, 5, 10, 20 and 40 ml)
- Nozzle outlet mounted on a swingjoint connection
- Adjustable carrying strap with quick-fastening clip system
- Professional PROFILE-type lance handle
- Hose length : 1.35 m
- 60 cm aluminium lance
- Multi-purpose, adjustable nozzle holder with integrated swirl plate
- Delivered with professional swirl nozzle for conical jet

PRESSURE SPRAYERS

ELYTE "PRO"

The most advanced compression sprayers on the market

Although the latest consumer studies classed the ELYTE N°1 range well ahead of all its competitors, the range is being developed further to become by far the most advanced on the market.

It is being improved in all aspects: ease of use, comfort and usable capacity. It is still available in two formats (6 L and 8 L). Gardeners and DIY fans will be happy to know that it comes in three versions: 'Plant care', 'weeding' and 'DIY'.

Adjustable cone nozzle.

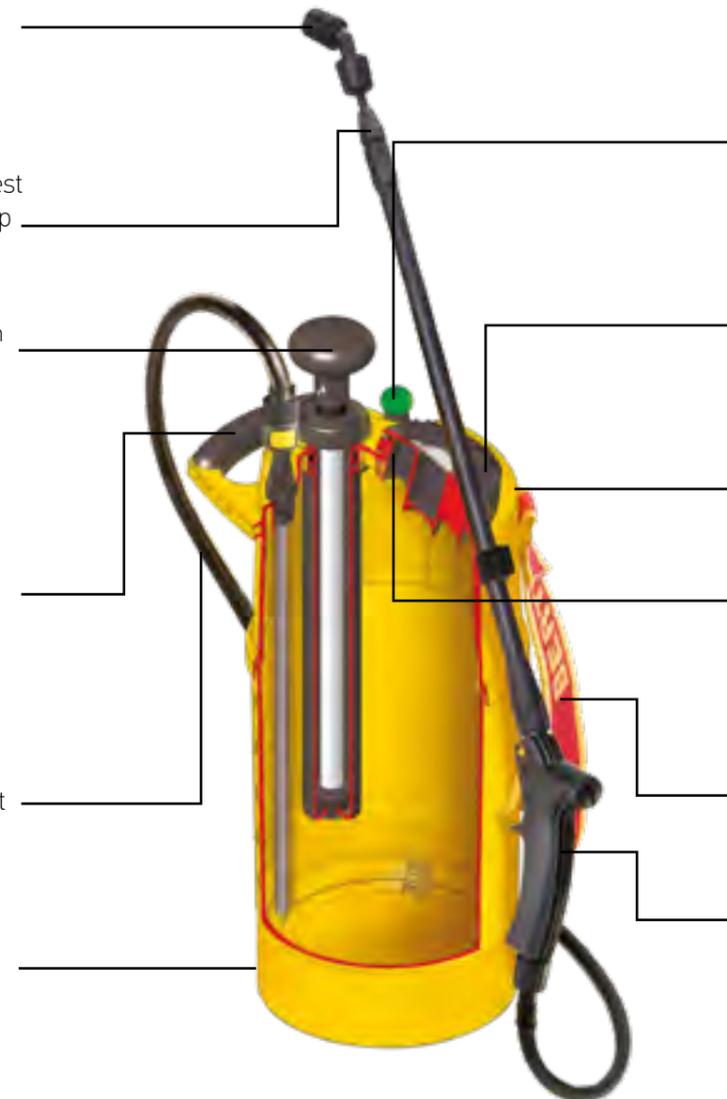

Composite telescopic lance (50/100cm) for best treatment with lance clip for easy storage.

Fixed pressure pump with aluminium rod, designed for unique effortless pumping comfort.

Large side handle makes it easy to grasp and carry.

Hose/lance unit is easy to handle and can be detached thanks to the high-resistance braided hose and a tubing outlet mounted on a quick swivel connector.

Graduated translucent tank with a useful capacity of 6L .

Safety valve with a 3 bar tare in order to prevent excess pressure in pumping and allowing for easy decompression of the sprayer.

Large filling orifice for easy filling and mixing.

Tank without retention area for each and complete emptying.

Cap with incorporated measurer (2, 3, 4, 5, 10, 20 and 40ml) for easy and precise metering and a practical storage trapdoor for the nozzles.

Wide and length-adjustable strap that is comfortable to carry.

Professional lance handle of the ergonomic PROFILE type with built-in filter that makes for very comfortable use.

ELYTE PRO

Technical characteristics and advantages for the user

FOR EASIER USE

	Characteristics	Advantages for the user
	Specific ELYTE pump	Unbeatable operational ease and comfort
	Wide opening separate from the pump	Easier filling, mixing and emptying
	Multi-purpose side handle	Very useful for each operational phase (pressurization, use, emptying rinsing/cleaning, storage)
	Shape of head without retention zone on emptying	Easy, quick and complete emptying
	Measuring cap (7 dosage possibilities: 2, 3, 4, 5, 10, 20 and 40 ml)	Easy and precise dosage
	Cap with storage trap for nozzles	Nozzles always to hand. No more risk of losing them
	Slide rail for easy storage of the lance	Easy storage of the lance. Simplified storage
	New professional nozzle with integrated nut	Practical to use, easy to change
	Quick release hose connection	Easier transport and storage
	Translucent reservoir	Visible liquid level
	Composite telescopic lance	For treatment as near as possible to the target area

FOR BETTER SAFETY

	Characteristics	Advantages for the user
	Fixed, off centre pump	User safety: no more need to take it off for filling and emptying
	Metal pump rod	Excellent perceived quality and robustness
	New valve with maximum pressure level indicator (< 3 bars) and sprayer decompression	No risk of excess pressure on pumping. Quick and easy decompression of the equipment.
	Large diameter cylindrical reservoir with graduated gauge	Higher effective usable capacity: 6 litres (instead of 5 litres). Excellent stability on the ground

FOR INCREASED COMFORT

	Characteristics	Advantages for the user
	Pommel-type pump handle	Comfortable to pump and aesthetic
	Quick release connector	Easier to handle the hose/pump unit
	Wide adjustable shoulder strap	Comfortable to carry
	Professional, ergonomic, PROFILE-type lance handle and integrated filter	Ensures a natural wrist and hand position

COSMOS 18 PRO

Crédit photo : Chaintreuil 2015

Comfort and performance

A popular product for professional sprayers, the BERTHOUD brand has launched the new generation of COSMOS 18.

As the old COSMOS 18 PRO is already very reliable only the comfort angle has been redesigned to improve user working conditions.

PERFORMANCE

- High performance pump up to 6 bars pressure
- Product mixer integrated into the pump to better blend the mixture

EASE OF USE

- Large diameter filler opening
- Sloping tank base prevents residual liquid at the end of the treatment
- Translucent graduated tank
- Easy to assemble and maintain
- Large volume anti-splash filter for quick filling

COMFORT

- Carrying handle for easy transport
- Lance holder for easy storage
- Equipment well adjusted for the back
- Reversible left/right pump lever
- Pump with less effort
- Natural position of the wrist and hand using the Profile handle

TIP N°3

“Adjust the dose according to the severity of the disease. Take preventive action but keep an eye on the disease and how it spreads. You have to know when to leave it alone and when to act.”

SERINGA

101025

For working at heights until 7m

- “Double action” syringe sprayer operating in two directions
- 2 multi-purpose multi-directional nozzles (swirl and flat fan)
- 10 m hose
- High operating pressure (4-5 bars depending on the pumping rate)
- Can be connected to a sprayer hose to use the tank as a reservoir
- 60 cm lance extension to treat areas that are difficult to reach
- Viton® seal to withstand hydrocarbons and solvents
- Clip to prevent the hose coming out of the container
- Strainer to filter liquids to avoid clogging the nozzle

COSMOS 18 PRO

102215

Ideal for larger gardens, orchards, vineyards etc

- 125 mm diameter filler opening
- Sloping tank base
- Carry handle
- Lance holder for easy storage
- More comfortable to use and the sprayer fits well on the back
- Translucent, graded 18 litre tank
- Manual pressure pump 6 bars
- Reversible left / right pump lever
- High performance hand pump with chemical resistant seals
- User friendly, heavy duty handle for precise spraying
- 60 cm aluminium lance
- Universal nozzle holder

COSMOS 18 PRO EXPORT

102216

VERMOREL

A unique concept

A renowned name amongst professionals thanks to 3 major assets :

- Exceptional carrying comfort new **safety harness**
- **High performance** diaphragm and curvilinear piston pump
- **A level of features never seen** before (notably for the Vermorel 2000 Pro Comfort)

PERFORMANCE

- Diaphragm pump for quick pressurization and low pumping frequency
- Viton seals for use with aggressive products
- Up to 5 bars pressure

PRECISION

- Fine drops, adjustable nozzle holder
- Pressure regulator for treating at the right pressure (from 1 to 5 bars)
- 1m telescopic lance to treat closer to the target
- 3 nozzle kit to suit the treatment required

EASY TO MAINTAIN

- Quick and easy to disassemble

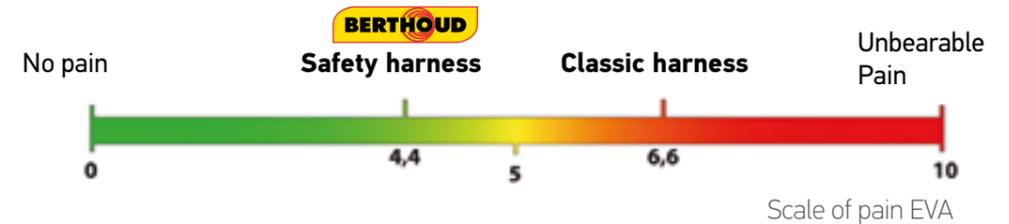

TIP N°4

“Apply weed killer in autumn when the sap is returning to the roots. Treatment is more effective and you use less weed killer.”

NEW SAFETY HARNESS

ON THE VERMOREL 2000 MODELS

- 1 year of studies and tests to determine the impact of wearing the sprayer on the user's back, with the hospital center of Villefranche-sur-Saône (Rhône, France)
- Development of a new carrying system that protects the back, allowing a longer and improved working period.
 - Reduce negative impacts on the spine and pelvis
 - Significant reduction in arduousness caused by the sprayer

Reinforced back support

- No direct contact with the tank for improved comfort

Adjustable waist strap and reinforced back

- Sprayer weight distribution : 70% on the hips / 30% on the shoulders
- Ensures sprayer stability

Adjustable straps with reinforced foam and tensioners

- Adjusts to the user's body shape
- Protects the user's shoulders

Chest strap

- Sprayer weight distribution : 70% on the hips / 30% on the shoulders
- Ensures sprayer stability

VERMOREL 1800

102084

For large gardens, orchards, trees and shrubs etc...

- Reservoir: capacity : 16 L with visible liquid level
- Ergonomic back frame, which perfectly fits the shape of your back
- Adjustable double shoulder straps
- Reversible left/right pump lever with 2 positions : storage and in operation (inclined position)
- High-performance diaphragm pump with curved piston (ease of handling and low pumping rate)
- Professional 'PROFILE'-type lance handle (comfort and accuracy)
- 60 cm composite lance with high mechanical and chemical resistance
- Multi-purpose adjustable nozzle holder
- Delivered with swirl nozzle and 15/10 plate

GARANTIE
GUARANTEE
5 ANS
YEARS

TIP N°5

For optimum treatment :

- To avoid chemical waste do not overpray
- Target usage precisely
- Avoid hot weather

VERMOREL 2000 PRO CONFORT

102022

For large gardens, orchards, trees and shrubs etc...

- Reservoir capacity : 16 L with visible liquid level
- Ergonomic back frame, which perfectly fits the shape of your back
- Reversible left/right pump lever, adjustable in all positions (for width and height – by notches of 10°)
- High-performance diaphragm pump with curved piston
- Pressure relief valve, adjustable from 0 to 5 bars
- Professional 'PROFILE'-type lance handle
- Composite telescopic lance, 60 cm / 100 cm, with high mechanical and chemical resistance
- Multi-purpose adjustable nozzle holder
- Delivered with the following equipment : 1 multi-purpose, adjustable nozzle holder equipped with original swirl nozzle with 15/10 plate, a blue flat fan nozzle and a blue anvil nozzle

VERMOREL 3000 ELECTRIC

BERTHOUD's innovation : The new ELECTRIC VERMOREL 3000, the benchmark in the market for electric sprayers

GARANTIE
GUARANTEE
2 ANS
YEARS

TRIED AND TESTED
BY PROFESSIONALS

COMFORT

- Comfort harness for optimum comfort during prolonged use
- Optimised design for a lighter weight product with a reduction of more than 1.5 kg compared to ELECTRIC VERMOREL 2000 (ref 102042). 6.2kg with battery

MAINTENANCE

- Easy access to battery / pump assembly

PERFORMANCE

- Lithium-ion battery for long lifespan
- 2,5hr battery life
- Twin diaphragm pump and Viton seals
Max flow: 2.6L/min
- Compatible with the full range of Berthoud accessories (including spray bars)

PRECISION

- Choice of 3 pressure settings
- Electronic pressure control for precise and constant spray
- Battery charge level indicator
- Immediate stop/start spraying trigger control

Supplied with 3 nozzles (Cone 15/10°, fan-blue and mirror-brown)

Chemical resistant telescopic lance (60cm - 100cm)

High performance twin diaphragm electric pump. Viton seals for the application of aggressive chemicals

Ergonomically designed lance handle

Rapid battery charger with charge indicator (2.5 hours max)

Available with large wheeled cart for easy manoeuvrability and 5m hose

Ergonomic back frame, which perfectly fits the shape of your back and is supplied with comfort harness for optimum comfort during prolonged use

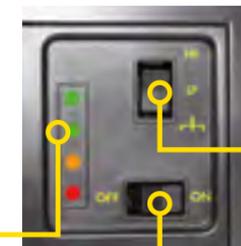

Translucent 18L tank with graduated gauge

12V lithium-ion battery

Battery charge level indicator (4 LEDs)

BERTHOUD also has a complete range of accessories for better treatments, greater ease and safety

A range of accessories that meets the needs for versatility of professional consumers. The new packaging makes it possible to make your choice very clearly.

GIANT COMPOSITE TELESCOPIC LANCES

280326
282447

All park and garden owners know that trees need to be treated at least twice a year (sometimes 3 times in the case of fruit trees): once in winter (winter treatment) then in the spring after flowering ("fruit worm").

Most mature trees are over 4/5 m high and standard spraying equipment is not adequate for treatment above that height. Giant telescopic lances made of BERTHOUD composite materials can be extended to 2.4 m or 3.6m.

They are the perfect tools for these jobs. They are light, rigid and strong. They are also highly chemical resistant and mechanically tough. They can also be used for treating rooves (moss control), a requirement for all house owners.

Send with hose, quick connect and PROFILE handle, 2.40 or 3.60 m long

PROFILE GRIP MULTIPURPOSE COMPOSITE SPRAYER LANCE

280327

PROFILE GRIP UNIVERSAL SPRAYER LANCE

280324

STOPREX GRIP UNIVERSAL SPRAYER LANCE

211665

PROFILE HANDLE

280310

Ergonomic : handle / lance angle ensures a natural wrist position

Reliable : valve closure system perpendicular to liquid flow

Easy maintenance : spring, seals and valve unscrew easily

Compatible : with lances with STOPREX thread including "giant" telescopic composite lances 2.40 m and 3.60 m in length

Possibility to fit accessories : pressure gauge, pressure regulator

TELESCOPIC SPRAY LANCES

280362

Profile or Stoprex grip Composite telescopic spray lance

STOPREX HANDLE

212370

Hand-operated for all sprayers Allows continuous spraying

60 CM LANCE EXTENSIONS

280363
280364

Profile or fuso grip-compatible 60 cm composite lance extension Ref. 280363

Profile or fuso grip-compatible 60 cm aluminium lance extension Ref. 280364

TIP N°6

" For insecticides and fungicides, vaporize in very fine droplets. When using contact products, also treat the backs of leaves and the stalks and branches.

For winter treatment, apply the product until it runs off and soaks into the bark, where parasites hibernate. "

NO-DRIP 1 BAR PRESSURE REGULATOR

283983

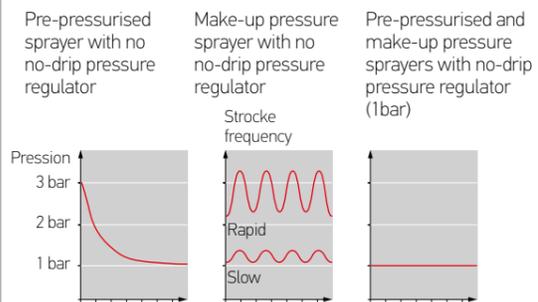

Pressure regulators help you protect the environment (and save you money)

- Our pressure regulators:
- Ensure you always have the right pressure of 1 bar at the nozzle tip
- Can save up to 50% on chemicals
- Ensure dosage stability
- Protect the environment by preventing overspraying
- Used with pre-pressurised sprayers, will extend acreage covered
- Used with pressure sprayers, will reduce the number of pump strokes required
- Can be used with all commercially available professional nozzle tips
- Integrated anti-drip system

WORKING PRESSURE FLUCTUATIONS CAUSE RANDOM DOSAGE

FLEXIBLE EXTENSION TUBE

211507

For reaching places that are difficult to access
Ideal for applications such as DIY and gardening

SILICONE GREASE SYRINGUE

219374

At least once or twice a year, or more if the sprayer is used intensively, it is necessary to grease all the seals (10g)

TIP N°8

“ Never pour left-over treatment products down the public drains.
Unused chemicals must be sent to a specialist collection centre.
Tank dregs and rinsing water should be spread on a gravel driveway or directly on the soil. “

TIP N°9

“For optimum treatment, keep to the recommended dose and treat local areas. Applying excess product does not improve performance in any way.
The doses stated on the packaging have been tested for effectiveness and for minimum danger to the environment.“

BOOMS

Booms convert a single-nozzle spray lance into a multi-nozzle lance to treat a large surface in one go.

- 2 sprays** : sprays two rows in a single run
- 3 sprays** : wide-boom herbicide treatment
- 4 sprays** : very wide boom herbicide spraying

SPRAY BOOM WITH 2 SWIVELMOUNTED NOZZLES
Ref. 220516

3-NOZZLE HERBICIDE BOOM
Ref. 255044

4-NOZZLE HERBICIDE BOOM
Ref. 215071

HERBICIDE SPRAY SHIELD

455004

Large-model spray shield for safe, effective spot application of herbicides
To be used with the flat fan nozzle

TIP N°7

“For spot weed killing, use a shield and do not spray when it is windy.
This prevents splashing and stops the weed killer drifting onto other plants.”
