

ESTATE RAILING

Our quality made estate fencing is manufactured in steel and is available in Galvanised and Powder Coated Black or in Galvanised only finish ready for painting.

When developing our estate railing we focused on traditional classic design, long lasting quality and ease of assembly on site.

Our estate fencing is the traditional "5 rail" constructed from round top rail with four flat steel bars and is designed for onsite assembly in a galvanized finish ready for painting or Galvanised and powder coated black. It is ideal for use on both flat ground and on hilly undulating ground as it can follow the contours of the land and can be easily curved to fit .

FEATURES

- Classic Design
- Galvanised or Galvanised and Powder Coated
- Service Life 35 Plus Years
- Easy to Install
