

Canadia 
NATURE'S FLOOR

canadia.ie

**Timeless
Elegance**

I'm delighted to welcome you to Canadia. We are one of Ireland's leading wood flooring specialists and have been providing beautiful wood floors for homes and more throughout Ireland for the last 25 years.

Our passion for floors started a long time ago and is influenced by our heritage of almost 100 years through our founders, the Mulvey family of Dundrum, Co Dublin. A carefully selected floor, be it in a modern house, new extension or indeed a house that is 100 years old, is something to behold. This is what Canadia is all about – creating timeless elegance.

Wood is truly the material of choice for creating plush spaces with a warm, natural feel. Our unique flooring collection includes many different species of wood in solid and engineered flooring and our laminate offering mixes our traditional favourites with the very latest colours and designs. With herringbone, chevron and other decorative patterns featuring in both wood and laminate. We believe floors are a focal point in the home and wish to share with you how our clients have used wood to enhance their interiors in the pages of this brochure and on our website through scanning the QR code.

We have a vast and beautiful collection of wood, complemented by an exclusive range of matching accessories. Our floors come from around the globe. From hardwood mills in Canada to pioneering production facilities in the Alps.

The Canadia engineered collection is selected from the finest hardwoods, machined with precision, ensuring world-class design, sustainability, style, innovation and quality are core to every Canadia floor.

Our expertise is what truly sets us apart. We invest significantly in training to ensure that our specialised team has an extensive product knowledge for every client requirement, specification and scale. We have been around a long time and we stand by every floor - ensuring its beauty for years to come.

We invite you to visit our state-of-the-art Design Showroom and experience our wide range of flooring on display. Alternatively, you can browse through our frequently updated website to become familiar with our latest product ranges, guidelines and all things Canadia.

Charlie Hamilton

Our products have a story

We are committed to working together with our supply chain for meaningful change. You can be assured that Canadia shares the vision of implementing sustainable forest management practices around the world. Our name originates from Canada, home to 10% of the world's forests, and Canada takes sustainability seriously. In more recent times, we have reduced our carbon footprint by sourcing similar products from European producers. As a PEFC certified organisation, Canadia is doing its part in helping and promoting sustainably produced products.

Our strapline 'Nature's Floor' sums up the essence of our brand - we recognise the growing demand for environmental solutions both from our clients and our deep-rooted commitment to our employees and our collective social responsibility. Our symbol of the end grain, the grain of wood seen when it is cut across the growth rings, symbolises the genuine natural beauty of our products.

Our company has PEFC (Programme for the Endorsement of Forest Certification) Chain of Custody Certification. The Programme for the Endorsement of Forest Certification is an international non-profit, non-governmental organisation dedicated to promoting Sustainable Forest Management through independent third-party certification.

FSC® is dedicated to the promotion of responsible forest management worldwide.

Ageing Gracefully

9013
White Oak
Tumbled
Herringbone

The tumbling process gives the floor a distressed aged-look which gives the impression that the floor has seen decades of use. The Architectural/Natural grade allows for sapwood which gives beautiful light coloured areas within the boards, adding to the overall character of this truly unique floor.
